1 Segmented market

- Automobile sector split into four segments ie. Two wheelers, passenger vehicles & Commercial Vehicles, each having few market leaders.
- Two-wheelers and passenger vehicles dominate the domestic demand
- 11,28,293 two wheeler units were sold in January 2022

2 Growth prospects

- The Indian automotive industry is expected to reach US\$ 300 billion by 2026.
- Strong policy support from the Government.
- A study by CEEW Centre for Energy Finance recognized US\$ 206 billion opportunity for electric vehicles in India by 2030. This will necessitate a US\$ 180 billion investment in vehicle manufacturing and charging infrastructure.

3 Fifth-largest automobile market

- India's annual production of automobiles in FY22 was 23.65 million vehicles, and 14 million vehicles were produced between April-October 2022.
- In FY22, total passenger vehicle sales reached ~2.9 million, while
- ~2.6 million units were sold in FY23 (until January 2023).
- 254,287 passenger vehicle units were sold in January 2023.
- Presence of established domestic and international original equipment manufacturers (OEMs).
- Strong market in terms of domestic demand and exports.

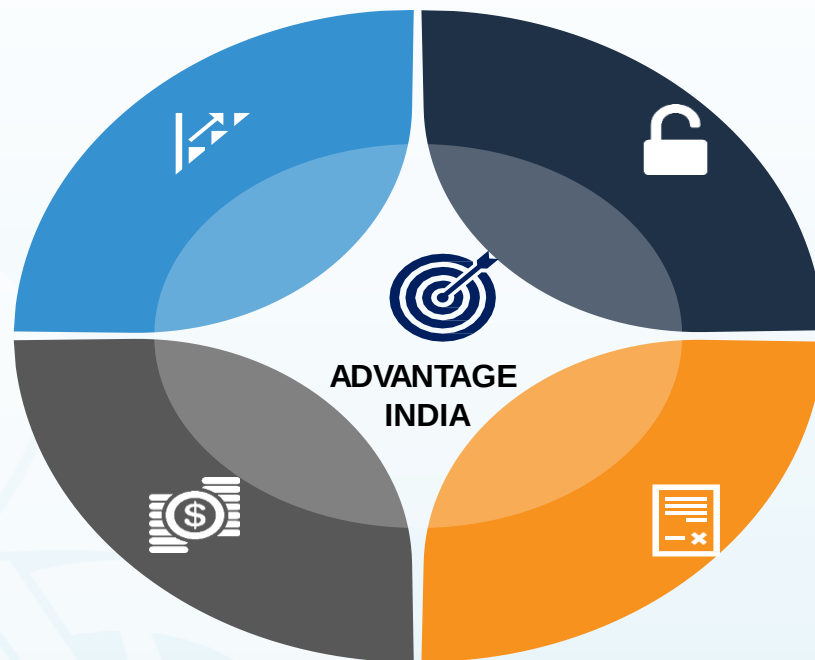

INDUSTRY ADVANTAGE

1 Growing demand

- ▶ Rise in middle class income and young population may result in strong growth.
- ▶ Indian automotive industry is targeting to increase export of vehicles by five times during 2016-26.
- ▶ In January 2022, total production of passenger vehicles*, three-wheelers, two-wheelers and quadricycles reached 1,860,809 units.
- ▶ Indian automobile exports stood at 424,037 units from April 2021 to December 2021, compared with 291,170 units from April 2020 to December 2020.

2 Rising Investments

- ▶ India has significant cost advantages. Auto firms save 10-25% on operations vis-a-vis Europe and Latin America.
- ▶ The automobile sector received cumulative equity FDI inflow of about US\$ 30.78 billion between April 2000- September 2021.
- ▶ The Government of India expects automobile sector to attract US\$ 8-10 billion in local and foreign investments by 2023.

3 Opportunities

- ▶ Focus shifting on electric cars to reduce emissions.
- ▶ Government aims to build India into a R&D hub.
- ▶ India could be a leader in shared mobility by 2030, providing opportunities for electric and autonomous vehicles.
- ▶ The electric vehicles industry is likely to create five crore jobs by 2030.

4 Policy support

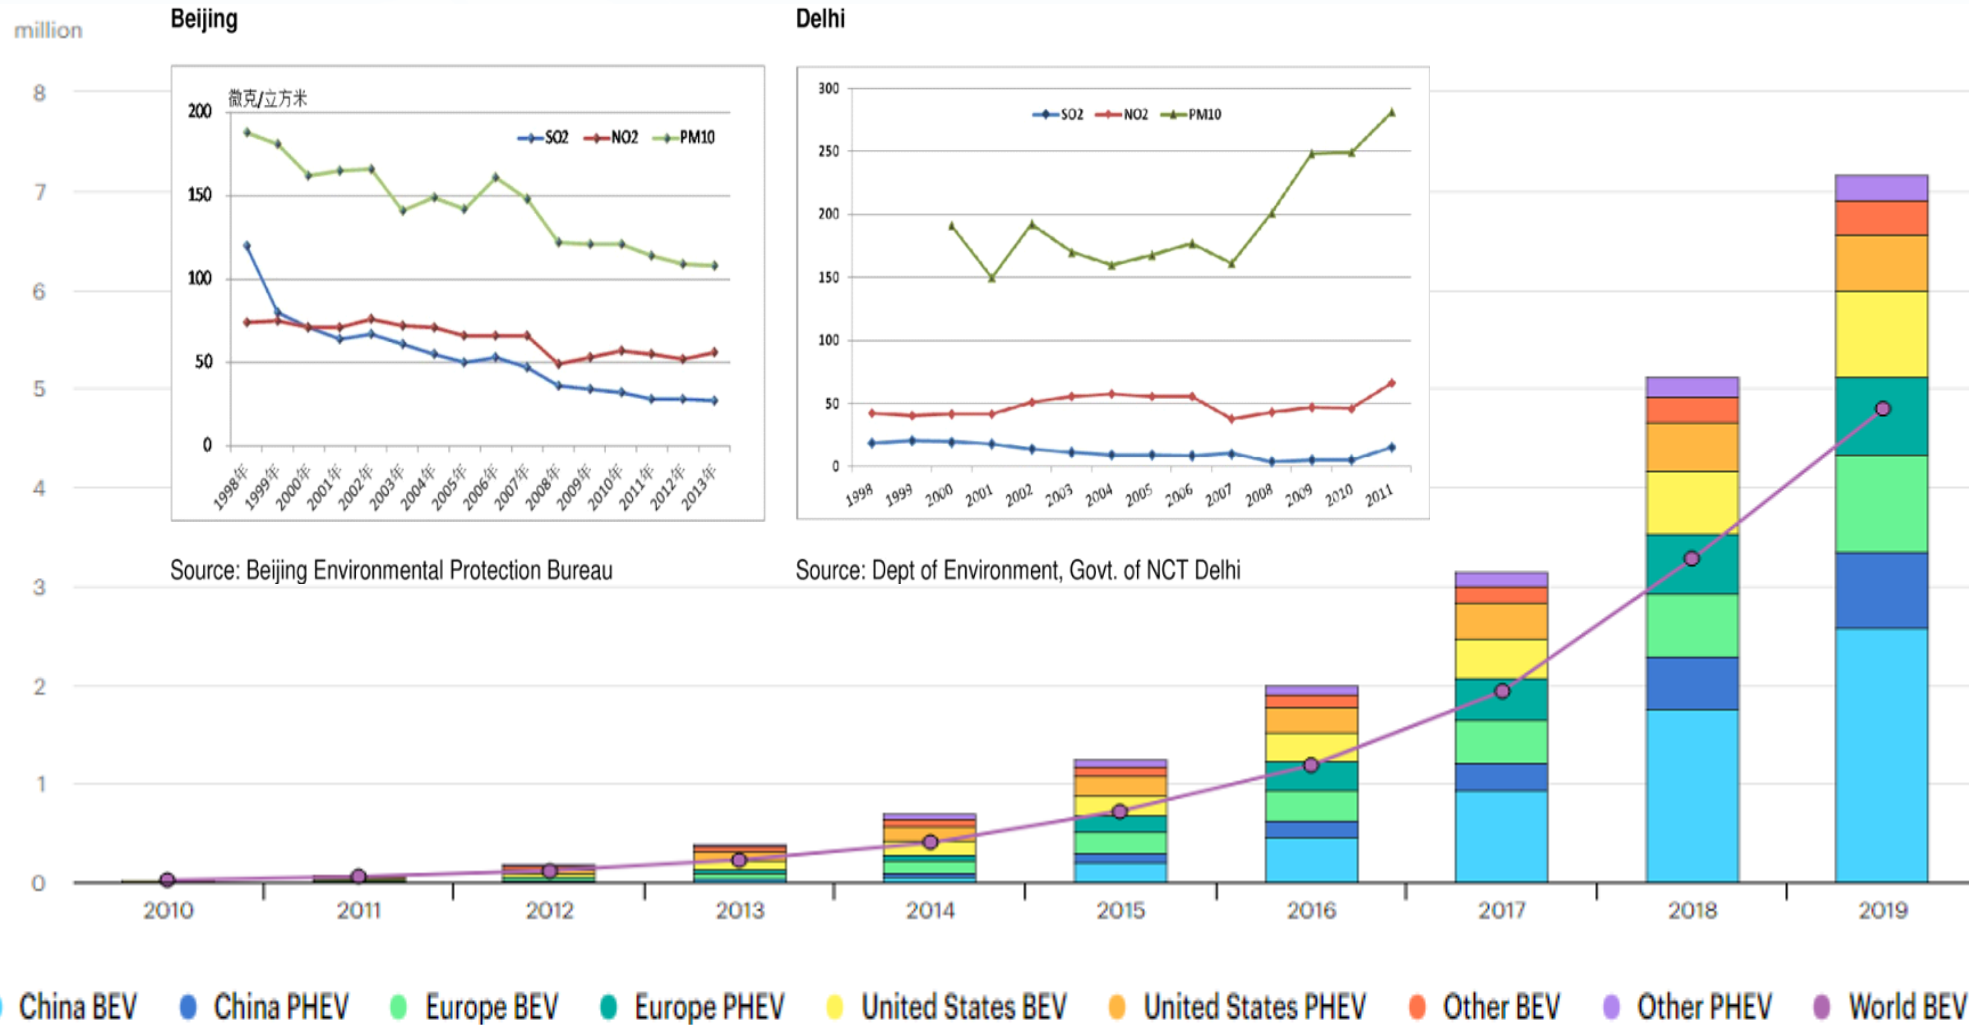

- ▶ Automotive Mission Plan 2016-26 is a mutual initiative by the Government of India and Indian Automotive Industry to lay down the roadmap for development of the industry.
- ▶ The Government aims to develop India as a global manufacturing centre
- ▶ In Union Budget 2022-23, the government announced increased allocation of capex, high target for national highways, and proposed an EV battery policy.

" The government target for the deployment of DC fast charges at various corridors and highway is expected to boost the market of this category during the forecast period"

WHY Electric Scooter

Direct correlation were observed in increasing in electric vehicle number vs. decreasing in Pollution level
